

```
1  function doubleCartItemQuantities(cart) {
2      const correctedCart = [];
3
4      for (let i = 0; i < cart.length; i++) {
5          // Double the quantity of the item
6          const item = {
7              itemName: `Item ${i + 1}`, // You can provide actual item names here
8              quantity: cart[i] * 2,
9          };
10         correctedCart.push(item);
11     }
12
13     return correctedCart;
14 }
```
